

Project Report

NAME: REN FEIYANG

SID: 59304550

COURSE CODE: CS3201

I wrote codes for both Client Side and Server Side, and the functions keep the same as requirements expected. Here I uploaded 2 screen shoots for each side. All the methods are perfectly realized, and the running outcomes are demonstrated below.

Screen Shoot (Client Side):

```
TodoTrackerClient_59304550: 127.0.0.1:18222
Valid Commands: ADD, LIST, REMOVE, MARK, QUIT
Please input the command:
ADD
banana
apple
orange
#
server: OK
ADD
I love playing basketball
I enjoy working out
#
server: OK
LIST
----- LIST -----
0000 | 2025-11-04 12:48:53 | pending
banana
apple
orange
0001 | 2025-11-04 12:49:36 | pending
I love playing basketball
I enjoy working out
-----
-----
REMOVE
Please enter the task IDs to be deleted (one per line, end with #):
0000
#
Server response: OK
LIST
----- LIST -----
0001 | 2025-11-04 12:49:36 | pending
I love playing basketball
I enjoy working out
-----
QUIT
Server response: OK
Connection closed, program exited.
```

Screen Shoot (Server Side):

```
Track server startup and listen on port: 18222
You can run the TodoTrackerClient to request on this port
New client connected:/127.0.0.1
Command Received: ADD
Command Received: ADD
Command Received: LIST
Command Received: MARK
Command Received: MARK
Command Received: LIST
Command Received: REMOVE
Command Received: REMOVE
Command Received: LIST
Command Received: QUIT
Client connection has been closed
```
